

*Don't be a victim of a dangerous and costly disaster.*

*The cost of repairing a boat that has been underwater is usually about 40% of its value.*

*Fuel or oil pollution fines may not be covered by your insurance policy.*

## Features

- Unlike other bilge alarms, the test button tests the complete system, including the sensors and bilge wiring.
- BilgAlarm™ systems monitor from 1 to 16 compartments standard.
- Optional dual power supplies, meaning that the system is wired to two separate batteries, if desired. BilgAlarm will draw its power from the strongest battery at any given time.
- Add an optional, full functioning, remote panel to the Master Stateroom or Captain's Quarters, if desired, for added safety and comfort while you sleep.
- Comes with everything you need for easy installation including bilge wiring, mounting hardware and stainless steel screws.

40,000 U.S. boats sink each year

*Saves your life and your investment*

*Designed by an Aerospace Engineer*

*There are no float switches or other moving parts to fail or burn out.*

*BilgAlarm™ is the most reliable system on the market today.*

For Power & Sail Boats

There's a BilgAlarm™ system for most every boat.

Every system comes with everything you need for easy installation!

## COMPLETE SYSTEMS

Two Sensor BilgAlarm™ System  
Model No. BA2R-4W

One Sensor BilgAlarm™ System  
Model No. BA1R-4W

Four Sensor BilgAlarm™ System  
Model No. BA4R-4W

For mid-sized boats, this two sensor system can protect two compartments or indicate low and high water in one compartment. It includes full system test functions and built in redundancy for an extremely reliable design. A mute button with automatic reset is also included. It's ultra-reliable! Monitoring power consumption is negligible.

For smaller boats, this one sensor system indicates high water in one compartment. It includes full system test functions and built in redundancy for an extremely reliable design. A mute button with automatic reset is also included. It's ultra-reliable! Monitoring power consumption is negligible.

For larger boats, this four sensor system can protect four compartments or indicate low and high water in two compartments. It includes full system test functions and built in redundancy for an extremely reliable design. A mute button with automatic reset is also included. It's ultra-reliable! Monitoring power consumption is negligible.
